Tatt2Away®

The Patented Templating Treatment System.

Tatt2Away® works with the body's natural healing process to expel ink pigment from the skin. The treatment uses proprietary templating with precision dermabrasion to disrupt the tattoo ink which the body expels in the form of an 'eschar' or debris scab. With careful attention to aftercare, the scabs shed to reveal fresh, ink free skin.

Safer, less painful and less expensive than laser, full tattoo removal can often be achieved in 3-5 sessions.

Tatt2Away®

Better *Out* than *In*.

When it comes to unwanted ink, the Tatt2Away® ethos is "better out than in". While lasers force ink waste deeper into the body's lymphatic system and organs, the Tatt2Away® method offers a safe, effective alternative that actually expels the ink from the body.

	Tatt2Away	LASER
Minimal pain experience	✓	✗
Ink extracted from the body	✓	✗
No ink waste in lymphatic system	✓	✗
Effective removal of ALL colours	✓	✗
No damage to hair follicles	✓	✗
Suitable for cosmetic make up removals	✓	✗
Average sessions for complete removal 3-5	✓	✗
Cost accessible	✓	✗
Advanced coverup freedom	✓	✗

The Tatt2Away® laser-free system is the most accurate, effective tattoo removal on the market today.

Tatt2Away®

The Process.

Committing to tattoo removal is a patient undertaking. Removal journeys are mapped out with an individualised program of treatment sessions by a highly skilled Tatt2Away® technician.
